I am writting to urge you to reject the NAB's petition 04-160. As an over the road truck driver I use the XM's instant traffic and weather stations whenever I'm about an hour from entering that specific city. I do this a SAFTY FACTOR. It's tough enough to manuver a big rig through all the construction and traffic that goes on durring a normal rush hour. XM's instant traffic and weather lets me know AHEAD OF TIME what routs and exits are closed due to construction or accidents as opposed to comming across these hazards unexpectedly, which can be very dangerous not only to me but the people around the truck as well. Not being from the city or area around it, you don't know what local stations are broadcasting and trying to find one that has this information is very distracting. I pay for this service just like I pay for my cable at home. Restricting or deleation of this service is a blatent infringement on freedom of rights
